

THE PARISH CHURCH OF ST MARGARET LOTHBURY†

Fabric report 2022

The front of the building was damaged when a vehicle was accidentally reversed into it. This damage has been successfully repaired.

The ladder between the nave and south aisle roofs has been repainted.

The ironmongery to the tower room door has been repainted.

The garden benches have been repainted.

A few pieces of wood have fallen from the choir screen eagle. This will be repaired as a priority.

The boiler broke down completely and has, after a winter using portable heaters, been replaced. A burst heating pipe under the flagstones just inside the church front door is in the process of being replaced.

Under seat heating is planned. This will need new power in the building to run three-phase heating and will not happen immediately. Some woodblock flooring will need to be lifted for the installation. It is planned to fix existing loose areas of woodblock flooring at the same time.
